

Patient Safety Component MDRO/CDI Module LabID Event Reporting: Locations and FacWideIN reporting in Acute Care Hospitals

Sunny Xu
NHSN Acute Care Analytics Team

March 2022

Objectives

Define FacWideIN and where it is used in NHSN's MDRO/CDI module

- Identify locations that are not covered by FacWideIN
- Understand how LabID events and summary data are reported for FacWideIN

Walk through FacWideIN reporting through NHSN analysis reports

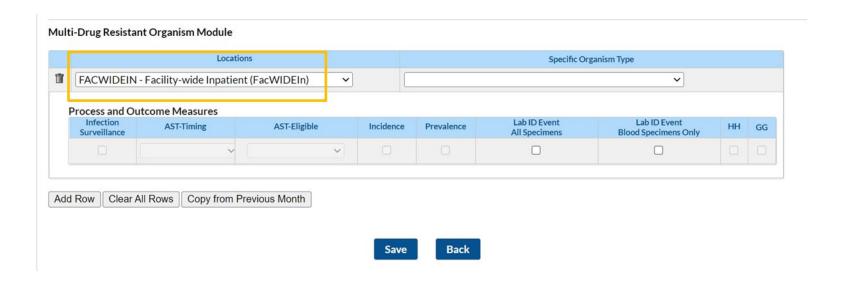

What is FacWideIN?

- FacWideIN stands for Facility-wide inpatient
- It is a location group identifier used to cover all inpatient locations physically located in the facility where denominator data are collected
 - ICUs, Wards, Step-down, Mixed Acuity, etc.
- Cannot be mapped in the location manager

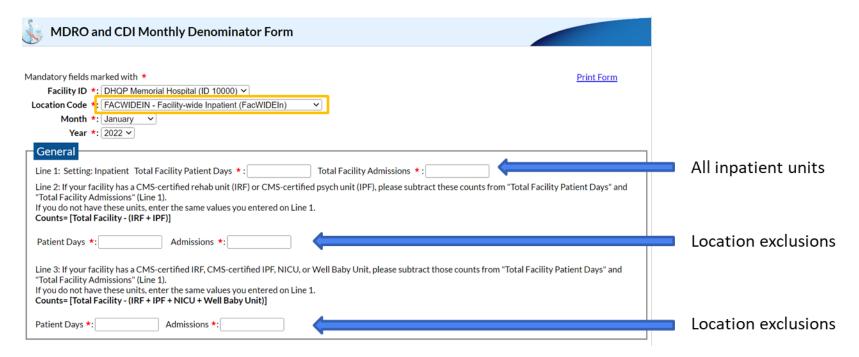

Where do we see FacWideIN?

Selection on monthly reporting plans

Where do we see FacWideIN?

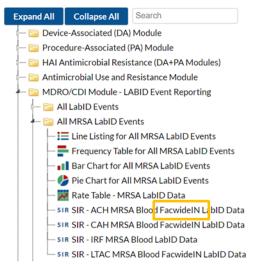

Monthly summary/denominator form

Where do we see FacWideIN?

- Analysis Reports: Rate Tables and SIR Reports
 - LabID MRSA and CDI SIRs are calculated at the FacWideIN level

ED and 24-hour observation locations for ACHs

- Emergency departments and 24-hour observation units are not covered by the FacWideIN location group
 - Added separately to the MDRO/CDI section of monthly reporting plan
 - Separate monthly summary form
- When following FacWideIN LabID event reporting, ED and 24-hour observation units also need to be followed because data from these units are used in risk adjustment for SIRs
 - Includes affiliated off-site EDs
 - Outpatient community-onset prevalence rate

CMS-Certified IRF and IPF units

- Special case: Inpatient units that have a separate CMS certification number (CCN)
 - Included in total facility patient days and admission counts (Line 1) of the FacWidelN summary form
 - Added separately to the MDRO/CDI section of monthly reporting plan, if applicable
 - Separate monthly summary form for unit-specific denominator
- CMS IRF unit within a hospital: if following CDI LabID event reporting for CMS Inpatient Rehabilitation Facility Quality Reporting (IRFQR)
 - Numerator and denominator data are separate from the hospital's FacWideIN
 CDI SIR to calculate IRF SIR

IRF = Inpatient Rehabilitation Facility; IPF = Inpatient Psychiatric Facility

What about LabID Events?

- Individual LabID events are reported at the location level
 - Cannot select FacWideIN on the LabID event form
 - SIR numerator algorithms use locations to determine which LabID events are counted in the FacWideIN SIR numerator
 - Events collected in CMS-certified IRF and IPF units are excluded
- Report No Events checkbox
 - Indicate when there no events to report for FacWideIN
 - Separate No Events checkbox for ED and 24-hour Observation Units

'Report No Events' checkbox

- Located on the monthly summary form
- Alerts
 - If no LabID event was reported in any inpatient location, check 'Report No Events' Box on FacWideIN summary form
 - Events that were reported in ED/OBS locations are not covered by the FacWidelN location group
 - Separate summary form and separate 'Report No Events' checkbox
- Note: If a facility does not appropriately check 'Report No Events,' that month's data will be excluded from the SIR calculations

FAQ: Why do I need to check the Report No Events box when my facility reported a CDI event this month?

- Action: Check CDI LabID event Line Listing report for the month
- Example: One CDI LabID event was reported in outpatient unit
- Alert is correct: Report No Events box should be checked on the FacWideIN summary form if the only CDI event reported for the month was in the emergency department

Report No Events box does not need to be checked on the ED summary form

Organism Selection/Co	nfirmat	ion of No	Even	ts					
Specific Organism Type	MRSA	Report No Events	CDIF	Report No Events	MSSA	Report No Events	CephR- Kleb	Report No Events	(
Infection Surveillance									ĺ
LabID Event (All specimens)			*						
LabID Event (Blood specimens only)									

Follow FacWideIN reporting through NHSN analysis reports
